

Reach out to your child's teacher about your child's specific results.

This Year We Worked On:

- Teaching literacy skills in subject disciplines. This focussed on reading skills within the subject. (e.g. How does a mathematician/historian read in their technical field? What sources do experts read?)
- Investigating Indigenous perspectives and developing instructional strategies that are authentically infused into instruction.

You Can Help By:

- Connect with your child's teacher with questions or inquiries about classroom instruction.
- Attend our "Coffee with the Principals" meetings to get updates on our education plan and other activities at school.
- Become a member of the School Council. Meetings are first Monday of the month. We seek input on our plan from our parent groups.

Next Year You Can Look Forward To:

- We will focus on developing a culture of excellence at CHS.
- Enhancing assessment practices that support student learning, inform instruction and promote student engagement.
- Continue to build literacy skills with a focus on writing across the disciplines.
